Andium are prepared and ready to *respond*

Proactive steps have been taken since the Grands Vaux flooding with robust emergency flood plans in place.

What Andium have done to get prepared

We are prepared and ready to respond when severe weather warnings are issued. Early warning systems in place and improved communication.

We work closely with Jersey Water, Jersey Met, GoJ, Environmental Services and the Parish of St Helier.

We have installed flood sensors in the drains on our estates as part of our Healthy Homes Project.

We will keep clients updated throughout any severe weather incident, via social media.

New bespoke flood defences at Nicholson Close will be fitted by Andium if / when needed.

Preventative drain clearance, monitored daily when bad weather is forecast.

What you (the tenant) need to do

Make sure Andium have your up-to-date contact details (mobile number & email address).

Ensure you have contents insurance.

Keep an eye on our social media channels and website for updates.

Andium's Duty Officer is on call 24/7 365 days a year. If you need immediate access to the flood defences, please call:

500799 option 1
